

Letter from the Founder

Welcome to the Integrity Business Solutions, Inc. (iBS) website.

My name is Teresa Lamar, Founder and President/CEO of iBS. Established in March 2000, Integrity Business Solutions, Inc. (iBS) is a multi-talented corporation serving the information technology, information assurance, and intelligence communities with a spirit of excellence, providing optimum security, confidentiality, and discretion to our customers.

My company was created out of my personal desire to change the face of the service industry; thereby, building upon the foundational principles of integrity, professionalism and character. Bringing more than 25 years of leadership experience from the corporate and government sectors, I stepped out on faith to start my own small business with the goal of redefining success,” as integrity in character, relationships, and partnerships” globally.

Specializing in IT, IA, Linguist and SIGINT needs, Integrity Business Solutions offers the personal touch of a small business- focusing on its main priorities; people and quality of service; while maintaining and cultivating successful business partnerships.

From the beginning we have set, and continue to set a high standard for creating a work culture of dignity and respect for both our internal and external customers. Realizing no one can build anything without an outstanding team of professionals; great value is placed on our individuals and teams, as they have supported the vision and mission of this organization and have helped to foster strategic partnerships – achieving the success I had envisioned.

I sincerely appreciate your consideration of our business solutions and portfolio of services; and look forward to sharing how our company may serve your business needs.

All the best,

Teresa Lamar,
Founder, President/CEO
Integrity Business Solutions, Inc. (iBS)
